PROJECTS

MY PORTFOLIO Website

>>> <https://myportfoliowebiste369.netlify.app/>

Myecomerstore.com

This website is built using React js and Tailwind css. I know how to play with any API and Its feature is that you can store products to cart and you Increase and decrease the number of products. You can delete products too.

Amazon-clone

This website is also built using React js and Tailwind css. Its feature is that you can store products to cart and remove from cart.

Restful-api

In This website there are a lot of products, in which you will see 3 products only and with pagination you can get all the products. You can also filter the product by its name.
